

SPORTident Station BS11-BS

Description

- The SPORTident Base Station 11 Beacon Small features **contactless registration of time records**
- The station works together with the SPORTident ActiveCard (SIAC) which records the station's signal over a distance of up to 1.80 metres
- The station works with an **unlimited** number of SIACs simultaneously
- Can be updated and recharged via USB
- The companion PC software SPORTident Config+ gives access to the full configuration of the station, allowing for flexible and advanced use cases
- The BS11-BS does not record passing SIACs. The **time records** are registered and stored on the SIACs only. However, the SIAC can send its records via radio to the SPORTident SRR (short range radio) dongle or GSM modem when passing a BS11-BS station
- The BS11-BS is easy to carry around and set up, as it weights only 150 grams
- This station is water-proof, robust and with an operating time of up to **75 hours on one battery charge**

Specifications
