Protection class	IP 67 (DIN EN 60529) - Protection against penetration of dust - Protection against the ingress of water during short-term immersion
Warranty	2 years
Weight	35 g
Dimensions	71 mm x 88 mm x 5 mm
Colours	Transparent

* At very low temperatures or very high altitude the formation of bubbles in the compass capsule is possible (but not obligatory). When a compass is subsequently placed under normal conditions, the bubbles tend to disappear and, in the future, might not reappear even in cold weather or at high altitude. (The plastic material after such "training" becomes more elastic.)
